

Beware of scary
robot inside!

Build It Yourself Lab Book

Robot door greeter

Boo!

Hazel & John

Problem

Having unfriendly neighbors makes life stressful! We don't like having drama with the people we live with.

Mission

We're going to build a very funny and friendly robot that will make our neighbors want to play with us!

The happier our neighbors,
the better our friendship ❤️

Step 1A:

Research!

What makes a funny and friendly robot?

Step 1B: Research!!

On a hunt for hilarious jokes

Important rules about jokes:

1. They should be funny for both the speaker and the listener
2. No offensive or insulting jokes (we want to be friends with our neighbors, not enemies)
3. They should be playful and creative!

Joke ideas:

Why don't skeletons fight each other? Because they don't have the guts!

Why can't you give Elsa a balloon? Because she'll let it go!

Why didn't the skeleton go to the party? Because she had no body to go with!

Why did the math book look so sad? Because it had too many problems!!!

getting started

with our

Scratch code

PART 1

The Basic Building Blocks

What do we think this code does?

Record the correct answer(s) on your lab book:

A

This code chooses the joke that the robot will play to the neighbors!

B

This code sets the position of the robot on the screen

C

This code sets the video and turns the video on!

D

This code sends a 'greeting' message to a separate block of code!

PART 1

The Basic Building Blocks

This code does the following!

The correct answers:

B

This code sets the position of the robot on the screen

C

This code sets the video and turns the video on!

D

This code sends a 'greeting' message to a separate block of code!

PART 2

The Basic Building Blocks

Now, now... What do we think this code does?

Record the correct answer(s) on your lab book:

A

This code is waiting patiently for a message (it's waiting to be greeted!)

B

This code makes our robot speak to our neighbors!

C

This code does nothing.....

PART 2

The Basic Building Blocks

This code does the following!

The correct answers:

A

This code is waiting patiently for a message (it's waiting to be greeted!)

B

This code makes our robot speak to our neighbors!

PART 3

More Complicated Code..

PART 4

Using lists to add more jokes

work in progress

Creating our physical robot greeters!

Step 1:

take a piece of
rectangular paper

roll the
paper into
a cylinder
& tape the
ends

Step 2:

cut a thin rectangle
(the shape of a ruler)
from another piece of
paper

the result

Step 3:

the back:

Step 4:

cut two tooth shapes from a scrap paper

glue your teeth behind the cylinder edge and in front of the thin rectangular

Step 5:

make your eyes out of scrap paper (or be creative & recycle your plastic bottle caps!)

glue your eyes to the front of your cylinder

step 6:
decorate your robot as you wish!

idea #1:
a hat for
your robot
head

idea #2:
add
some
eyebrows

idea #3:
change the
shape of
your nose

cone-
shaped
nose
